

Mission Statement

Aim;

DSG Close Protection Ltd and its Senior Management Team, aim to continue to be an industry leader in delivering flexible, ethical and professional security solutions to clients across the UK and further afield with little or no notice of requirement, which has become one of our unique selling points.

Working closely with our operational team and staff, many of whom are British military veterans, we will pursue appropriate, well paid work opportunities, offering an inclusive professional and understanding management team.

We will evaluate and encourage relevant industry training for both the business and its employees, and finally, DSG will always use the best professional and industry practices for all who come under our operational umbrella.

Our wider team is our most valued asset and it is against the weakest link of that team, that we will be judged. To advocate and deliver an engaged and supported workforce will enhance our continued success in what is a very competitive industry.
